Net Sales

For the period ended March 31, 2016, the Group posted a consolidated net sales of P24,761 million for an increase of P4,073 million or a growth of 19.7% compared to P20,689 million in the same period of 2015. New stores put up in 2015 were fully operating in 2016 increasing consolidated net sales in addition to robust like for like stores sales growth and revenue contributions from new organic stores/outlets put up as well as acquisitions made in 2015. Like for like consolidated sales performance indicators of the group for the period ended March 31 are as follow:

	PGOLD		S&R	
	2016	2015	2016	2015
Net Sales	7.3%	4.7%	4.8%	0.8%
Net Ticket	6.3%	6.9%	1.4%	-2.4%
Traffic	0.9%	-2.1%	3.4%	3.3%

Gross Profit

For the period ended March 31, 2016, the Group realized an increase of 12.6% in consolidated gross profit from P3,658 million in 2015 to P4,119 million in 2016 of the same period, driven by strong sales growth from new and old stores and consistent and continuing suppliers' support through additional trade discounts in the form of rebates and conditional discounts granted during the period. Consolidated gross profit margin was posted at 16.6% and 17.7% while gross income stood at 19.5% and 20.8% for the periods ended March 31, 2016 and 2015, respectively.

Other Operating Income

Other operating income increased by P67 million or 10.3% from P647 million in the year ended March 31, 2015 to P713 million in 2016 of the same period. This is attributable to increase in display allowance, listing fee and other supplier supports driven mainly by new stores offering new spaces for product displays and booths for third party retailers, new product listings and other promotions to increase customer and supplier's supports.

Operating Expenses

Operating expenses increased by P337 million or 11.9% from P2,829 million in the three-month period ended March 31, 2015 to P3,166 million in 2016 of the same period. The increase was mainly attributable to manpower cost of the Group's new organic stores, as well as rent expenses relative to new lease contracts, depreciation expense and taxes, all related to acquisitions and operation of new organic stores.

Other Expense - net

Other expenses net of other income amounted to P24 million for the three-month period ended March 31, 2016 while other income net of other expenses amounted to P13 million for the three-month period ended March 31, 2015. Interest expense increased in March 2016 due to additional loans availed in late 2015.

Net Income

For the period ended March 31, 2016, the Group earned a consolidated net income of P1,154 million at 4.7% net margin and an increase of 9.5% from P1,054 million at 5.1% net margin in 2015 of the same period. This was principally driven by the continuous expansion of the Group both organic as well as strategic acquisitions and investments and combined management strategies and programs to boost revenue contributions from both the base stores as well as new stores (both organic and strategic acquisitions) complemented by operating efficiencies and strategic costs controls on operating expenses at its current level.

Working Capital

As at March 31, 2016 and December 31, 2015, the Group's working capital stood at P9,253 million and P8,408 million, respectively. The Group's current ratio improved to 1.88 as at March 2016 from 1.58 as at December 2015.

Current Assets

As at March 31, 2016 and December 31, 2015, total current assets amounted to P19,758 million or 35.3% of total assets, and P23,014 million or 39.1% of total assets, respectively, for a decrease of P3,256 million or 14.1% as at March 31, 2016.

Cash and cash equivalents as at March 31, 2016 amounted to P2,710 million or 4.8% of total assets and decreased by P3,537 million or 56.6% compared to previous year-end balance. Decrease in the account was attributable mainly to settlement of trade and non-trade payables, payment for 2015 cash dividend, partial settlement of loans and capital expenditures for 2016 new stores.

Receivables amounted to P2,340 million as at March 31, 2016 or 4.2% of total assets, with a decrease of P343 million or 12.8% from P2,683 million in December 2015. The decrease was due to collections made during the period, bulk of which came from the high year end receivables. This includes trade and non-trade receivables, net of P7 million allowance for impairment losses.

Merchandise inventory amounted to P13,266 million or 23.7% of total assets at the end of March 2016. Total inventory increased by P283 million or 2.2% principally due to stocking requirements of existing and new operating stores.

Investments in trading securities amounted to P35 million as at March 31, 2016 and P34 million in December 2015.

Prepaid expenses and other current assets increased by P340 million or 31.8% due to increase in prepaid expenses from availment of new policies for insurance of new stores, creditable withholding tax and advance payment of rent for soon to open stores.

Noncurrent Assets

As at March 31, 2016 and December 31, 2015, total noncurrent assets amounted to P36,207 million or 64.7% of total assets, and P35,829 million or 60.9% of total assets, respectively, for an increase of P378 million or 1.1% as at March 31, 2016.

Investments amounted to P868 million as at March 31, 2016 and December 31, 2015.

Net book values of property and equipment increased by P321 million or 2.3% from P14,034 million in December 2015 to P14,355 million in March 2016.

Intangibles amounted to P19,559 million as at March 31, 2016 and P19,521 million as at December 31, 2015.

Other noncurrent assets amounted P1,425 million as at March 31, 2016 and P1,406 million as at December 31, 2015.

Current Liabilities

As at March 31, 2016 and December 31, 2015, total current liabilities amounted to P10,505 million or 18.8% of total assets, and P14,606 million or 24.8% of total assets, respectively, for a decrease of P4,102 million or 28.1% as at March 31, 2016.

Accounts payable and accrued expenses decreased by P4,221 million or 43.2% primarily due to settlement of trade and nontrade liabilities, bulk of which came from the high year end payables and payment of cash dividend to stockholders.

Loans payable decreased by P310 million or 9.9% from P3,138 million in December 2015 to P2,828 million in March 2016 due to settlement of short term loan during the period.

Income tax payable increased by P502 million from P759 million in December 2015 to P1,261 million in March 2016 due to recognition of income tax expense for the three-month period.

Trust receipts payable amounted to P6 million as at March 31, 2016 and increased by P1 million from purchases made for goods covered under the trust receipts agreement.

Due to related parties amounted to P39 million and P30 million for the period ended March 2016 and December 2015, respectively. This pertains to royalty fees.

Current maturities of long term debt amounted to P510 million as at March 31, 2016. The decrease was due to partial settlement of the loan amount during the period.

Other current liabilities decreased by P23 million or 7.0% from P327 million in December 2015 to P304 million in March 2016 relatively due to redemption of gift certificates and PERKS points earned by members and settlement of VAT payable.

Noncurrent Liabilities

As at March 31, 2016 and December 31, 2015, total noncurrent liabilities amounted to P5,894 million or 10.5% of total assets, and P5,824 million or 9.9% of total assets, respectively, for an increase of P70 million or 1.2% as at March 31, 2016.

Noncurrent accrued rent increased by P89 million or 3.6% from P2,493 million in December 2015 to P2,582 million in March 2016 due to recognition of rent expense for lease contracts entered into by the Parent Company and its subsidiaries in compliance with PAS 17 – *Leases*.

Deferred tax liabilities net of deferred tax assets amounted to P477 million and P496 million as at March 31, 2016 and December 31, 2015, respectively.

III. Sources and Uses of Cash

The Group's primary sources of liquidity are basically net cash inflows provided by operating activities and cash obtained from loans with banks as and when required.

Principal uses of cash are operating expenses, capital expenditures for stores expansion as well as investments in strategic business acquisitions of existing and operating supermarket store outlets.

A brief summary of cash flows during the comparative periods is shown below:

	For the Three-month Periods Ended March 31	
<i>(In millions)</i>	2016	2015
Net cash used in operating activities	(P1,618)	(P3,043)
Net cash used in investing activities	(719)	(1,114)
Net cash used in financing activities	(1,200)	(243)
Net decrease in cash and cash equivalents	(P3,537)	(P4,401)

Net cash used in operating activities amounted to P1,618 million for the three-month period ended March 31, 2016. This was mainly attributable to settlement of payables to both trade and nontrade suppliers to avail early payment discounts, purchase of inventories and other related current operating items to support the Group's expansion.

Net cash used in investing activities amounted to P719 million for the three-month period ended March 31, 2016. This was utilized for the acquisition of equipment, furniture & fixtures, construction of buildings and improvements on leased assets as at the end of the period.

Net cash used in financing activities amounted to P1,200 million for the three-month period ended March 31, 2016. This pertains to payment of P830 million cash dividends to stockholders and settlement of short term loans during the period.

IV. Material Events and Uncertainties

There are no known trends or any known demands, commitments, events or uncertainties that will result in or that are reasonably likely to result in the Group's liquidity increasing or decreasing in any material way.

There are no events that will trigger direct or contingent financial obligation that is material to the Group, including any default or acceleration of an obligation;

There are no material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the Group with unconsolidated entities or other persons created during the year.

There are no material commitments for capital expenditures other than those performed in the ordinary course of trade of business in line with the Group's retail outlets expansion program.

There are no known trends, events or uncertainties that have had or that are reasonably expected to have a material impact on the revenues or income from continuing operations.

There are no significant elements of income not arising from continuing operations.

The Group experiences the fourth quarter of the year as the peak season relating to increased sales resulting from Christmas and New Year holidays.

PUREGOLD PRICE CLUB, INC. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. Reporting Entity

Puregold Price Club, Inc. (the “Parent Company”) was incorporated and registered with the Philippine Securities and Exchange Commission (SEC) on September 8, 1998. Its shares are listed in the Philippine Stock Exchange (PSE) since October 5, 2011 with stock symbol of PGOLD. Its immediate and ultimate parent company is Cosco Capital, Inc. (Cosco) which is incorporated in the Philippines. Cosco is formerly named Alcorn Gold Resources Corporation and is also listed with the PSE since September 26, 1998.

The Parent Company is principally involved in the business of trading goods such as consumer products (canned goods, housewares, toiletries, dry goods, food products, pharmaceutical and medical goods, etc.) on a wholesale and retail basis. Its registered office is located at 900 Romualdez Street, Paco, Manila.

The consolidated financial statements include the accounts of the Parent Company and the following subsidiaries (collectively referred to as “the Group”) which are all incorporated in the Philippines:

	Percentage of Ownership	
	2016	2015
Kareila Management Corporation (KMC) ^(a)	100	100
S&R Pizza (Harbor Point), Inc. ^(d)	100	100
PPCI Subic, Inc. (PSI) ^(b)	100	100
Entenso Equities Incorporated (Entenso) ^(c)	100	100
Goldtempo Company Incorporated (Goldtempo) ^(e)	100	100
Daily Commodities, Inc. (DCI) ^(f)	100	100
First Lane Super Traders Co., Inc. (FLSTCI) ^(f)	100	100

(a) Operator of S&R Membership Shopping; incorporated and registered with the Philippine SEC in 2004; acquired by the Parent Company on May 28, 2012 through a Share Swap Agreement (see Note 9).

(b) Incorporated and registered with the Philippine SEC on May 31, 2012 and started commercial operations on September 20, 2012 (see Note 9).

(c) Incorporated and registered with the Philippine SEC on May 22, 2013 as a holding company (see Note 9).

(d) A wholly-owned subsidiary of KMC incorporated on May 25, 2015 (see Note 9).

(e) Acquired on August 26, 2015 through Entenso which subsequently acquired the significant assets of Bargain City, Inc. Multi-Merchantrade Inc. and Superplus Corporation. (see Note 9).

(f) Acquired on February 3, 2015 through Entenso through a stock acquisition (see Note 9).

All subsidiaries are engaged in the same business as the Parent Company except for Entenso whose primary purpose is to invest in, purchase, subscribed for, or otherwise acquire and own, hold, use, develop, sell, assign, transfer, mortgage, pledge, exchange, or otherwise dispose real and personal property of every kind of description.

Acquisition of Company E

On January 14, 2013, the Parent Company’s BOD approved the acquisition of Company E (the company behind the Eunilaine Foodmart and Grocer E Supermart chains) via share acquisition.

Acquisition of Entenso

On July 3, 2013, the Parent Company’s Board of Directors (BOD) approved the acquisition of Entenso’s entire outstanding capital stock. On the same day, Entenso’s BOD approved the increase in Entenso’s authorized capital stock from P5 million divided

into 50,000 shares at P100 par value to P1 billion divided into 10,000,000 shares at P100 par value.

Acquisition of Subic

The Parent Company invested P3.13 million in PPCI Subic Inc., an entity incorporated in the Philippines on May 31, 2012. The investment represents 100% of the issued capital stock of Subic (see Note 9).

Acquisition of Kareila

On May 28, 2012, the Parent Company issued 766,406,250 new common shares, with P1 par value, from its own authorized but unissued capital in exchange for 1,703,125 common shares, with P100 par value per share of Kareila representing 100% of its outstanding capital stock (see Note 9). The fair market value of the Parent Company's shares based on the observable market price as at the date of acquisition is P21.50 per share or P16,477.73 million.

Merger with Company E

On March 25, 2014, the BOD approved the merger of Company E Corporation with the Parent Company. It was then ratified by at least two-thirds (2/3) votes of the stockholders on May 13, 2014 during the annual stockholders' meeting. On March 12, 2015, the Plan and Articles of Merger by and between the Parent Company and Company E Corporation was approved by SEC. Effective April 1, 2015, the entire assets and liabilities of Company E Corporation were transferred to and absorbed by the Parent Company.

Salient features of the Plan of Merger are as follows:

- The Parent Company shall be the surviving entity and the existence of Company E shall cease. The effective date of the merger shall be the date when the SEC approves and issues the Certificate of Merger.
- All the assets, rights, powers, privileges, immunities, franchises and businesses of Company E as at the effective date of the merger, shall be deemed assigned, transferred to and vested to the Parent Company as discussed per Section 80(A) of the Corporation Code, without need of any further act or deed.
- Upon the effective date of merger, the Parent Company shall assume all outstanding liabilities, obligations and undertakings of Company E as at the effective date of merger.
- All issued and outstanding capital stock of Company E on the effective date of the merger shall be cancelled but no new shares of stock shall be issued to the stockholders of Company E considering that the constituent entity is a wholly-owned subsidiary of the Parent Company. The net assets of Company E shall form part of the retained earnings of the Parent Company as the surviving entity.

2. Basis of Preparation

Statement of Compliance

The consolidated financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRSs). PFRSs are based on International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB). PFRSs which are issued by the Philippine Financial Reporting Standards Council (FRSC), consist of PFRSs, Philippine Accounting Standards (PASs), and Philippine Interpretations.

Basis of Measurement

The Group's consolidated financial statements have been prepared on the historical cost basis of accounting, except for:

Items	Measurement Bases
Investments in trading securities	Fair value
Retirement benefits liability	Present value of defined benefit obligation less fair value of the plan asset

Functional and Presentation Currency

The consolidated financial statements are presented in Philippine peso, which is also the Parent Company's functional currency. All financial information expressed in Philippine peso has been rounded off to the nearest peso, unless otherwise stated.

Use of Judgments, Estimates and Assumptions

The Group's consolidated financial statements prepared in accordance with PFRSs require management to make judgments, estimates and assumptions that affect the application of accounting policies and the amounts reported in the consolidated financial statements at the reporting date. However, uncertainty about these estimates and assumptions could result in an outcome that could require a material adjustment to the carrying amount of the affected asset or liability in the future.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

Classifying Financial Instruments

The Group exercises judgments in classifying a financial instrument, or its component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial asset or liability. The substance of a financial instrument, rather than its legal form, governs its classification in the consolidated statements of financial position.

In addition, the Group classifies financial assets by evaluating, among others, whether the asset is quoted or not in an active market. Included in the evaluation on whether a financial asset is quoted in an active market is the determination on whether the quoted prices are readily and regularly available and whether those prices represent actual and regularly occurring market transactions on an arm's length basis.

Financial assets are classified as financial assets at fair value through profit or loss (FVPL), held-to-maturity (HTM) investments, loans and receivables and available-for-sale (AFS) financial assets. Financial liabilities, on the other hand, are classified as either financial liabilities at FVPL or other financial liabilities.

Determining the Fair Value of Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or in the most advantageous market for the asset or liability. The principal or most advantageous market must be accessible to the Group.

The fair value of an asset or liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for the asset or liability that are not based on observable market data.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing the categorization at the end of each reporting period.

'Day 1' Profit. Where the transaction price in a non-active market is different from the fair value from other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and the fair value (a 'Day 1' profit) in profit or loss unless it qualifies for recognition as some other type of asset. In cases where data used is not observable, the difference between the transaction price and model value is only recognized in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the 'Day 1' profit amount.

The determination of fair values of the Group's financial instruments is presented in Note 28 to the consolidated financial statements.

Assessing Joint Arrangements

The Group determines the type of joint arrangement in which it is involved by considering its rights and obligations. An entity assesses its rights and obligations by considering the structure and legal form of the arrangement, the contractual terms agreed to by the parties to the arrangement and, when relevant, other facts and circumstances. Joint arrangements is classified into two types: joint operations and joint ventures. A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement (i.e., joint operators) have rights to the assets, and obligations for the liabilities, relating to the arrangement. A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement (i.e., joint venturers) have rights to the net assets of the arrangement.

The Group has determined that its investments in joint arrangements are classified as investments in joint ventures.

As at March 31, 2016 and December 31, 2015, the carrying amount of its investments in joint ventures amounted to P432.40 million (see Note 9).

Distinction between Investment Property and Property and Equipment

The Group determines whether a property qualifies as investment property. In making its judgment, the Group considers whether the property generates cash flows largely independent of the other assets held by the Group. Property and equipment or owner-occupied properties generate cash flows that are attributable not only to the property but also to the other assets used in the production or supply process.

The Group has determined that its properties are classified as owner-occupied properties.

Assessing Lease Agreements

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date and requires assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

Operating Leases - Group as a Lessee

The Group has entered into various lease agreements as a lessee. The Group has determined that the lessor retains all significant risks and rewards of ownership of these properties which are leased out under operating lease arrangements.

Rent expense recognized in profit or loss amounted to P588.59 million, and P553.08 million in March 2016 and December 2015, respectively (see Notes 17 and 19).

Operating Leases - Group as a Lessor

The Group has entered into various lease agreements as a lessor to sublease portion of its stores to various lessees. The Group has determined that the lessor retains all significant risks and rewards of ownership of these properties which are leased out under operating lease arrangements.

Rent income recognized in profit or loss amounted to P91.45 million and P105.53 million in March 2016 and December 2015, respectively (see Notes 17 and 18).

Assessment of Computer Software and Licenses and Leasehold Rights

The Group acquired computer software and licenses and leasehold rights to be used for its primary line of business. Based on the following attributes, the Group assessed that the computer software and licenses and leasehold rights are intangible assets since: (1) these are separable; in the case of computer software and licenses, these are not integral part of the related hardware, thus, the Group can sell the software and licenses individually or together with a related contract, asset or liability, and (2) they arose from contractual or other legal rights.

Estimates

The key estimates and assumptions used in the consolidated financial statements are based on management's evaluation of relevant facts and circumstances as at the reporting date. Actual results could differ from such estimates.

Estimating Allowance for Impairment Losses on Receivables

The Group maintains an allowance for impairment losses on receivables at a level considered adequate to provide for uncollectible receivables. The level of this allowance is evaluated by the Group on the basis of factors that affect the collectability of the accounts. These factors include, but are not limited to, the length of the Group's relationship with debtors and, their payment behavior and known market factors. The

Group reviews the age and status of the receivable, and identifies accounts that are to be provided with allowance on a regular basis. The amount and timing of recorded expenses for any period would differ if the Group made different judgment or utilized different estimates. An increase in the Group's allowance for impairment losses on receivables would increase the Group's recorded operating expenses and decrease current assets.

The allowance for impairment losses on receivables amounted to P7.46 million as at March 31, 2016 and December 31, 2015. The Group did not recognize an additional allowance for impairment losses on receivables because the Group believes that all outstanding receivables are recoverable. The carrying amount of receivables amounted to P2,340.29 million and P2,683.10 million as at March 31, 2016 and December 31, 2015, respectively (see Note 5).

Estimating Net Realizable Value (NRV) of Merchandise Inventory

The Group carries merchandise inventory at NRV whenever the selling price less costs to sell becomes lower than cost due to damage, physical deterioration, obsolescence, changes in price levels or other causes (i.e., pre-termination of contracts). The estimate of the NRV is reviewed regularly.

Estimates of NRV are based on the most reliable evidence available at the time the estimates are made on the amount the inventories are expected to be realized. These estimates take into consideration fluctuations of prices or costs directly relating to events occurring after reporting date to the extent that such events confirm conditions existing at reporting date. The NRV is reviewed periodically to reflect the accurate valuation in the financial records.

The carrying amount of merchandise inventory amounted to P13,266.23 million and P12,982.83 million as at March 31, 2016 and December 31, 2015, respectively (see Note 6).

Estimating Useful Lives of Property and Equipment

The Group estimates the useful lives of property and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of property and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

In addition, the estimation of the useful lives of property and equipment is based on collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of property and equipment would increase recorded operating expenses and decrease noncurrent assets.

Depreciation and amortization recognized in profit or loss amounted to P334.21 million and P294.82 million in March 31, 2016 and 2015, respectively (see Note 10 and 19). Property and equipment, net of accumulated depreciation, amounted to P14,354.60 million and P14,033.74 million as at March 31, 2016 and December 31, 2015, respectively (see Note 10).

Estimating Useful Lives of Computer Software and Licenses and Leasehold Rights

The Group estimates the useful lives and amortization methods of computer software and licenses and leasehold rights based on the period and pattern in which the assets' future economic benefits are expected to be consumed by the Group. The estimated useful lives

and amortization period of computer software and licenses and leasehold rights are reviewed at each reporting date and are updated if there are changes in the expected useful lives or the expected pattern of consumption of future economic benefits embodied in the computer software and licenses and leasehold rights. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in the assumptions used.

Amortization recognized in profit or loss amounted to P7.53 million and P5.39 million in March 31, 2016 and 2015, respectively (see Note 11 and 19). Net carrying value of computer software and licenses and leasehold rights amounted to P238.83 million and P237.92 million as at March 31, 2016 and December 31, 2015, respectively (see Note 11).

Impairment of Goodwill, Trademarks and Customer Relationships with Indefinite Lives

The Group determines whether goodwill, trademarks and customer relationships are impaired at least annually. This requires the estimation of the recoverable amounts of the goodwill, trademarks and customer relationships. Estimating recoverable amounts requires management to make an estimate of the expected future cash flows from the cash-generating unit to which the goodwill, trademarks and customer relationships relate and to choose a suitable discount rate to calculate the present value of those cash flows.

The carrying amounts of goodwill, trademarks and customer relationships with indefinite useful lives amounted to P19,319.93 million and P19,283.20 million as at March 31, 2016 and December 31, 2015, respectively. (see Note 11).

Estimating Realizability of Deferred Tax Assets

The Group reviews its deferred tax assets at each reporting date and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. The Group reviews its projected performance in assessing the sufficiency of future taxable income.

In determining the amount of current and deferred tax, the Group takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. The Group believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of many factors, including interpretation of tax law and prior experience. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. New information may become available that causes the Group to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

Impairment of Non-financial Assets

PFRSs require that an impairment review be performed on non-financial assets other than merchandise inventory and deferred tax assets when events or changes in circumstances indicate that the carrying amounts may not be recoverable. Determining the recoverable amount of assets requires estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets. While it is believed that the assumptions used in the estimation of recoverable amounts are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable amounts and any resulting impairment loss could have a material adverse impact on the Group's results of operations.

There were no impairment losses on property and equipment and other non-financial assets recognized in March 2016 and December 2015.

Estimating Retirement Benefits Liability and Cost

The determination of the Group's obligation and cost of retirement benefits is dependent on the selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions include among others, discount rate and salary increase rates. Remeasurements of the retirement benefits liability are recognized in other comprehensive income and comprise of actuarial gains and losses on the retirement benefit obligation, return on plan assets, excluding amounts included in the net interest of the pension benefit obligation and any change in the effect of the asset ceiling.

Retirement benefits liability amounted to P439.87 million as at March 31, 2016 and December 31, 2015 (see Note 22).

Estimating Provisions and Contingencies

The Group, in the ordinary course of business, sets up appropriate provisions for its present legal or constructive obligations in accordance with its policies on provisions and contingencies. In recognizing and measuring provisions, management takes risks and uncertainties into account.

As at March 31, 2016 and December 31, 2015, the Group does not have any contingent legal or constructive obligation that requires provision.

3. Summary of Significant Accounting Policies

The accounting policies set out below have been applied consistently to all years presented in these consolidated financial statements, except for the change in accounting policy as explained below.

Adoption of New or Revised Standards, Amendments to Standards and Interpretations

The Group has adopted the following relevant and applicable amendments starting January 1, 2015 and accordingly, changed its accounting policies. Except as otherwise indicated, the adoption of these amendments did not have any significant impact on the Group's consolidated financial statements.

- *Defined Benefit Plans: Employee Contributions (Amendments to PAS 19).* The amendments apply to contributions from employees or third parties to defined benefit plans. The objective of the amendments is to simplify the accounting for contributions that are independent of the number of years of employee service, for example, employee contributions that are calculated according to a fixed percentage of salary.
- *Annual Improvements to PFRSs: 2010 - 2012 and 2011 - 2013 Cycles -* Amendments were made to a total of nine standards, with changes made to the standards on business combinations and fair value measurement in both cycles. Earlier application is permitted, in which case the related consequential amendments to other PFRSs would also apply. Special transitional requirements have been set for amendments to the following standards: PFRS 2, PAS 16, PAS 38 and PAS 40. The following are the said improvements or amendments to PFRSs, none of which has a significant effect on the consolidated financial statements of the Group:
 - *Classification and measurement of contingent consideration (Amendments to PFRS 3).* The amendments clarify the classification and measurement of contingent consideration in a business combination. When contingent consideration is a financial instrument, its classification as a liability or equity is

determined by reference to PAS 32, *Financial Instruments: Presentation*, rather than to any other PFRSs. Contingent consideration that is classified as an asset or a liability is always subsequently measured at fair value, with changes in fair value recognized in profit or loss.

Consequential amendments are also made to PAS 39, *Financial Instruments: Recognition and Measurement* and PFRS 9, *Financial Instruments* to prohibit contingent consideration from subsequently being measured at amortized cost. In addition, PAS 37, *Provisions, Contingent Liabilities and Contingent Assets* is amended to exclude provisions related to contingent consideration.

- *Scope exclusion for the formation of joint arrangements (Amendment to PFRS 3).* PFRS 3 has been amended to clarify that the standard does not apply to the accounting for the formation of all types of joint arrangements in PFRS 11, *Joint Arrangements* - i.e. including joint operations - in the financial statements of the joint arrangements themselves.
- *Definition of 'related party' (Amendment to PAS 24).* The definition of a 'related party' is extended to include a management entity that provides key management personnel (KMP) services to the reporting entity, either directly or through a group entity. For related party transactions that arise when KMP services are provided to a reporting entity, the reporting entity is required to separately disclose the amounts that it has recognized as an expense for those services that are provided by a management entity; however, it is not required to 'look through' the management entity and disclose compensation paid by the management entity to the individuals providing the KMP services. The reporting entity will also need to disclose other transactions with the management entity under the existing disclosure requirements of PAS 24 - e.g. loans.

Standards Issued but Not Yet Adopted

A number of new standards and amendments to standards are effective for annual periods beginning after January 1, 2015. However, the Group has not applied these new or amended standards in preparing these consolidated financial statements. Unless otherwise stated, none of these are expected to have a significant impact on the Group's consolidated financial statements.

Effective July 1, 2016

- *Accounting for Acquisitions of Interests in Joint Operations (Amendments to PFRS 11).* The amendments require business combination accounting to be applied to acquisitions of interests in a joint operation that constitutes a business. Business combination accounting also applies to the acquisition of additional interests in a joint operation while the joint operator retains joint control. The additional interest acquired will be measured at fair value. The previously held interests in the joint operation will not be remeasured.

The amendments place the focus firmly on the definition of a business, because this is key to determining whether the acquisition is accounted for as a business combination or as the acquisition of a collection of assets. As a result, this places pressure on the judgment applied in making this determination.

The amendments apply prospectively for annual periods beginning on or after January 1, 2016. Early adoption is permitted.

- *Clarification of Acceptable Methods of Depreciation and Amortization (Amendments to PAS 16 and PAS 38).* The amendments to PAS 38, *Intangible Assets* introduce a rebuttable presumption that the use of revenue-based amortization methods for intangible assets is inappropriate. This presumption can be overcome only when revenue and the consumption of the economic benefits of the intangible asset are 'highly correlated', or when the intangible asset is expressed as a measure of revenue.

The amendments to PAS 16, *Property, Plant and Equipment* explicitly state that revenue-based methods of depreciation cannot be used for property, plant and equipment. This is because such methods reflect factors other than the consumption of economic benefits embodied in the asset - e.g. changes in sales volumes and prices.

The amendments are effective for annual periods beginning on or after January 1, 2016, and are to be applied prospectively. Early application is permitted.

- *Investment Entities: Applying the Consolidation Exception (Amendments to PFRS 10, PFRS 12 and PAS 28)* clarifies that:
 - A subsidiary that provides investment-related services should not be consolidated if the subsidiary itself is an investment entity.
 - The exemption from preparing consolidated financial statements for an intermediate held by an investment entity, even though the investment entity does not consolidate the intermediate.
 - When applying the equity method to an associate or a joint venture, a non-investment entity investor in an investment entity may retain the fair value measurement applied by the associate or joint venture to its interests in subsidiaries.

The amendments are to be applied retrospectively for annual periods beginning on or after January 1, 2016. Early adoption is permitted.

- *Disclosure Initiative (Amendments to PAS 1)* addresses some concerns expressed about existing presentation and disclosure requirements and to ensure that entities are able to use judgment when applying PAS 1. The amendments clarify that:
 - Information should not be obscured by aggregating or by providing immaterial information.
 - Materiality considerations apply to all parts of the financial statements, even when a standard requires a specific disclosure.
 - The list of line items to be presented in the statement of financial position and statement of profit or loss and other comprehensive income can be disaggregated and aggregated as relevant and additional guidance on subtotals in these statements.
 - An entity's share of OCI of equity-accounted associates and joint ventures should be presented in aggregate as single line items based on whether or not it will subsequently be reclassified to profit or loss.

The amendments are to be applied retrospectively for annual periods beginning on or after January 1, 2016. Early adoption is permitted.

Effective January 1, 2018

- PFRS 9, *Financial Instruments (2014)*. PFRS 9 (2014) replaces PAS 39, *Financial Instruments: Recognition and Measurement* and supersedes the previously published versions of PFRS 9 that introduced new classifications and measurement requirements (in 2009 and 2010) and a new hedge accounting model (in 2013). PFRS 9 includes revised guidance on the classification and measurement of financial assets, including a new expected credit loss model for calculating impairment, guidance on own credit risk on financial liabilities measured at fair value and supplements the new general hedge accounting requirements published in 2013. PFRS 9 incorporates new hedge accounting requirements that represent a major overhaul of hedge accounting and introduces significant improvements by aligning the accounting more closely with risk management.

The new standard is to be applied retrospectively for annual periods beginning on or after January 1, 2018, with early adoption permitted.

- PFRS 15, *Revenue from Contracts with Customers* replaces PAS 11, *Construction Contracts*, PAS 18 *Revenue*, IFRIC 13 *Customer Loyalty Programmes*, IFRIC 18 *Transfer of Assets from Customers* and SIC-31 *Revenue - Barter Transactions Involving Advertising Services*. The new standard introduces a new revenue recognition model for contracts with customers which specifies that revenue should be recognized when (or as) a company transfers control of goods or services to a customer at the amount to which the company expects to be entitled. Depending on whether certain criteria are met, revenue is recognized over time, in a manner that best reflects the company's performance, or at a point in time, when control of the goods or services is transferred to the customer. The standard does not apply to insurance contracts, financial instruments or lease contracts, which fall in the scope of other PFRSs. It also does not apply if two companies in the same line of business exchange non-monetary assets to facilitate sales to other parties. Furthermore, if a contract with a customer is partly in the scope of another IFRS, then the guidance on separation and measurement contained in the other PFRS takes precedence.

However, the FRSC has yet to issue/approve this new revenue standard for local adoption pending completion of a study by the Philippine Interpretations Committee on its impact on the real estate industry. If approved, the standard is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted.

To be Adopted on January 1, 2019

- PFRS 16, *Leases* supersedes PAS 17, *Leases* and the related Philippine Interpretations. The new standard introduces a single lease accounting model for lessees under which all major leases are recognized on-balance sheet, removing the lease classification test. Lease accounting for lessors essentially remains unchanged except for a number of details including the application of the new lease definition, new sale-and-leaseback guidance, new sub-lease guidance and new disclosure requirements. Practical expedients and targeted reliefs were introduced including an optional lessee exemption for short-term leases (leases with a term of 12 months or less) and low-value items, as well as the permission of portfolio-level accounting instead of applying the requirements to individual leases. New estimates and judgmental thresholds that affect the identification, classification and measurement of lease transactions, as well as requirements to reassess certain key estimates and

judgments at each reporting date were introduced.

PFRS 16 is effective for annual periods beginning on or after January 1, 2019. Earlier application is not permitted until the FRSC has adopted PFRS 15.

The Group will assess the impact of the above new and revised standards and amendments to standards on the separate financial statements upon their adoption on their respective effective dates.

Basis of Consolidation

Business Combinations Under Common Control

Business combinations arising from transfer of interest in entities under control are accounted for using the pooling of interest method, prospectively from the acquisition date as allowed under PIC Q&A 2012-01. Under the prospective pooling of interest method, the assets and liabilities acquired are recognized at the book values or carrying amounts recognized in the acquiree's stand alone financial statements from the acquisition date. The difference between the book value of net assets acquired and the consideration paid or equity instruments issued is recognized in equity, under retained earnings. The profit or loss of the acquirees are consolidated from the acquisition date. Comparative periods are not restated.

Business Combinations other than Under Common Control

Business combinations and acquisition of entities other than those under common control are accounted for using the acquisition method as at the acquisition date – i.e. when control is transferred to the Group.

The Group measures goodwill at the acquisition date as:

- The fair value of the consideration transferred; plus
- The recognized amount of any non-controlling interests in the acquire; plus
- if the business combination is achieved in stages, the fair value of the pre-existing equity interest in the acquire; less
- the net recognized amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

Subsidiaries

Subsidiaries are entities controlled by the Group. In accordance with PFRS 10 *Consolidated Financial Statements*, the Group controls an entity when it is exposed to, or has the rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of the subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Loss of Control

On the loss of control, the Group derecognizes the assets and liabilities of the subsidiary, any non-controlling interests and other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognized in profit or loss. If the Group retains any interest in the previous subsidiary, then such interest is measured at fair value on the date that control is lost. Subsequently, that retained interest is accounted for as an equity-accounted investee or as an AFS financial asset depending on the level of influence retained.

Transactions Eliminated on Consolidation

All intra-group balances, transactions, income and expenses and profits and losses resulting from intra-group transactions that are recognized in assets and liabilities, are eliminated in preparing the consolidated financial statements, in accordance with the accounting policy on consolidation. Unrealized losses are eliminated unless costs cannot be recovered.

The financial statements of the subsidiaries are prepared for the same reporting period as the Parent Company, using consistent accounting policies for like transactions and other events in similar circumstances.

Financial Instruments

Date of Recognition

The Group recognizes a financial asset or a financial liability in the consolidated statements of financial position when it becomes a party to the contractual provisions of the instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using settlement date accounting.

Initial Recognition of Financial Instruments

Financial instruments are recognized initially at fair value. The initial measurement of financial instruments, except for those designated at fair value through profit or loss (FVPL), includes directly attributable transaction costs.

Subsequent to initial recognition, the Group classifies its financial assets into the following categories: held-to-maturity (HTM) investments, available-for-sale (AFS) financial assets, FVPL financial assets, and loans and receivables. The Group classifies its financial liabilities as either FVPL financial liabilities or other financial liabilities. The classification depends on the purpose for which the investments are acquired and whether they are quoted in an active market. Management determines the classification of the Group's financial assets and financial liabilities at initial recognition and, where allowed and appropriate, re-evaluates such designation at every reporting date.

The Group had no HTM investments and FVPL financial liabilities as at March 31, 2016 and December 31, 2015.

Financial Assets at FVPL

Financial assets at FVPL include financial assets held for trading and financial assets designated upon initial recognition at FVPL and those classified under this category through the fair value option.

Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term.

Financial assets may be designated by management at initial recognition at FVPL or reclassified under this category through fair value option, when any of the following criteria is met:

- the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or recognizing gains or losses on a different basis; or
- the assets and liabilities are part of a group of financial assets, financial liabilities or both which are managed and their performance are evaluated on a fair value basis, in accordance with a documented risk management or investment strategy; or

- the financial instrument contains an embedded derivative, unless the embedded derivative does not significantly modify the cash flows or it is clear, with little or no analysis, that it would not be separately recognized.

The Group carries financial assets at FVPL using fair values. Fair value changes and realized gains and losses are recognized as part of profit or loss.

The Group's investments in trading securities are classified under this category (see Note 7).

Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not designated as AFS financial assets or FVPL financial assets.

Subsequent to initial measurement, loans and receivables are carried at amortized cost using the effective interest method, less any impairment in value. Any interest earned on loans and receivables shall be recognized as part of "Interest income" in profit or loss on an accrual basis. Gains or losses are recognized in profit or loss when loans and receivables are derecognized or impaired.

The Group's cash and cash equivalents, receivables and security deposits are included in this category (see Notes 4, 5, 12, 21, 27 and 28).

Cash includes cash on hand and in banks which are stated at face value. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from the date of acquisition and are subject to an insignificant risk of changes in value.

AFS Financial Assets

The Group's investment in equity securities is classified as AFS financial assets. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses, and foreign exchange gains and losses on AFS financial assets monetary items, are recognised directly in equity. When an investment is derecognised, the cumulative gain or loss in equity is transferred to profit or loss.

The Group's AFS equity instrument is carried at cost since its fair value cannot be determined reliably in the absence of observable market data on the related assets (see Note 9).

Other Financial Liabilities

This category pertains to financial liabilities that are not designated or classified as at FVPL. After initial measurement, other financial liabilities are carried at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any premium or discount and any directly attributable transaction costs that are considered an integral part of the effective interest rate of the liability.

The Group's accounts payable and accrued expenses, short-term loans and long-term loans payable, due to related parties, trust receipts payable, other current liabilities and noncurrent accrued rent are included in this category (see Notes 13, 14, 15, 21, 27 and 28).

Debt Issue Costs

Debt issue costs are considered as directly attributable transaction costs upon initial

measurement of the related debt and are subsequently considered as an adjustment to the amortized cost and effective yield of the related debt using the effective interest rate method. When a loan is paid, the related unamortized debt issue costs at the date of repayment are recognized in profit or loss.

Derecognition of Financial Assets and Liabilities

Financial Assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; or
- the Group has transferred its rights to receive cash flows from the asset and either:
(a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group’s continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to pay.

Financial Liabilities

A financial liability is derecognized when the obligation under the liability is discharged, or cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented at gross amounts in the consolidated statements of financial position.

Fair Value Measurements

The fair value for financial instruments traded in active markets at the reporting date is based on their quoted market price or dealer price quotations without any deduction for transaction costs.

For all other financial instruments not listed in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include the discounted cash flow method, comparison to similar instruments for which market observable price exist, options pricing models and other relevant valuation modes.

Merchandise Inventory

Merchandise inventory is stated at the lower of cost and NRV. Cost is determined using the moving average method. Costs comprise of purchase price, including duties, transport and handling costs, and other incidental expenses incurred in bringing the merchandise inventory to its present location and condition.

NRV is the estimated selling price in the ordinary course of business, less the estimated costs necessary to make the sale.

Property and Equipment

Property and equipment, excluding land and construction in progress, are carried at cost less accumulated depreciation, amortization and impairment losses, if any. Land is carried at cost. Construction in progress represents structures under construction and is stated at cost. This includes the costs of construction and other direct costs. Construction in progress is not depreciated until such time that the relevant assets are ready for use.

Initially, an item of property and equipment is measured at its cost, which comprises its purchase price and any directly attributable costs of bringing the asset to the location and condition for its intended use. Subsequent expenditures are added to the carrying amount of the asset when it is probable that future economic benefits, in excess of the originally assessed standard of performance, will flow to the Group. All other subsequent expenditures are recognized in profit or loss.

Depreciation and amortization are computed on a straight-line basis over the estimated useful lives of the related assets as follows:

	Number of Years
Building	15 - 30
Furniture and fixtures	3 - 20
Office and store equipment	2 - 15
Leasehold improvements	15 - 20 or term of the lease, whichever is shorter

The useful lives and depreciation and amortization method are reviewed at each reporting date to ensure that they are consistent with the expected pattern of economic benefits from those assets.

When an asset is disposed of, or is permanently withdrawn from use and no future economic benefits are expected from its disposal, the cost and accumulated depreciation, amortization and impairment losses, if any, are removed from the accounts and any resulting gain or loss arising from the retirement or disposal is recognized in profit or loss.

Investments in Joint Ventures and Associates

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control on an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

An associate is an enterprise in which the investor has significant influence but not control, generally accompanying a shareholding between 20% and 50% of the voting rights.

The Group's investments in joint ventures and associates are accounted for under the

equity method of accounting. Under the equity method, investments in joint ventures and associates are initially recognized at cost and the carrying amount is increased or decreased to recognize the Group's share of the profit or loss of the investments in joint ventures and associates after the date of acquisition. The Group's share in profit or loss of the joint ventures and associates are recognized in the Group's profit or loss. Dividends received from the investments in joint ventures and associates reduce the carrying amount of the investments.

Investment in a Joint Operation

A joint arrangement is classified as joint operations when the Group has rights to the assets and obligations for the liabilities relating to the arrangement. The Group recognizes its share in the results of the joint arrangement aside from the compensation from the use of its land and building. The Group has no capital commitments or contingent liabilities in relation to its interests in joint arrangements.

Intangible Assets and Goodwill

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Subsequently, intangible assets are measured at cost less accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditures are recognized in profit or loss in the year in which the related expenditures are incurred. The useful lives of intangible assets are assessed to be either finite or indefinite.

The Group assessed the useful life of trademark and customer relationship to be indefinite. Based on an analysis of all the relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate cash inflows for the Group.

Trademark and customer relationship with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. Such intangibles are not amortized. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

Computer software and licenses and leasehold rights are separately acquired by the Group that has finite useful life is measured at cost less accumulated amortization and impairment losses, if any.

Subsequent costs are capitalized only when they increase the future economic benefits embodied in the assets to which they relate. All other expenditures are recognized in profit or loss when incurred.

The amortization is computed using the straight-line method over the estimated useful life of the capitalized software from the date it is available for use and amortized over five (5) years. Leasehold rights are amortized on a straight-line basis over the lease period of twenty (20) years. The estimated useful life and the amortization method of an intangible asset with finite useful life are reviewed at each reporting date.

Gain or loss on disposal or retirement of an intangible asset with finite useful life is recognized in profit or loss when the asset is disposed of or retired.

Goodwill

Goodwill that arises on the acquisition of subsidiaries is presented with intangible assets.

For the measurement of goodwill at initial recognition, see policy on basis of consolidation. Goodwill is subsequently measured at cost less accumulated impairment losses. In respect of equity accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment, and any impairment loss is allocated to the carrying amount of the equity accounted investee as a whole.

Impairment of Assets

Financial Assets

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events had a negative effect on the estimated future cash flows of that asset.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate.

Significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed collectively in groups that share similar credit risk characteristics.

Evidence of impairment for specific impairment purposes may include indications that the borrower or a group of borrowers is experiencing financial difficulty, default or delinquency in principal or interest payments, or may enter into bankruptcy or other form of financial reorganization intended to alleviate the financial condition of the borrower. For collective impairment purposes, evidence of impairment may include observable data on existing economic conditions or industry-wide developments indicating that there is a measurable decrease in the estimated future cash flows of related assets.

If there is objective evidence of impairment, the amount of loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses) discounted at the financial asset's original effective interest rate (i.e., the effective interest rate computed at initial recognition). Time value is generally not considered when the effect of discounting the cash flows is not material. For collective impairment purposes, impairment loss is computed based on their respective default and historical loss experience.

The carrying amount of the asset shall be reduced either directly or through use of an allowance account. The impairment loss for the period shall be recognized in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in profit or loss, to the extent that the carrying value of the assets does not exceed its amortized cost at the reversal date.

AFS Financial Assets

If an AFS financial asset is impaired, an amount comprising the difference between the cost (net of any principal payment and amortization) and its current fair value, less any impairment loss on that financial asset previously recognized in profit or loss, is transferred from equity to profit or loss. Reversals in respect of equity instruments classified as AFS financial assets are not recognized in profit or loss, if the increase in fair value of the instrument can be objectively related to an event occurring after the impairment loss was recognized in profit or loss.

All impairment losses are recognized in profit or loss.

Non-financial Assets

The carrying amounts of the Group's non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill and indefinite-lived intangible assets are tested annually for impairment. An impairment loss is recognized if the carrying amount of an asset or cash-generating unit (CGU) exceeds its recoverable amount.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value of money and the risks specific to the asset or CGU. For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Subject to an operating segment ceiling test, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment testing is performed reflects the lowest level at which goodwill is monitored for internal reporting purposes. Goodwill acquired in a business combination is allocated to groups of CGUs that are expected to benefit from the synergies of the combination.

Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the CGU (group of CGUs), and then to reduce the carrying amounts of the other assets in the CGU (group of CGUs) on a pro-rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

Employee Benefits

Short-term Employee Benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Retirement Benefits Cost

The Group's net obligation in respect of the defined benefit plan is calculated by estimating the amount of the future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligation is performed on a periodic basis by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan, if any.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then net defined benefit liability (asset), taking into account any changes in the net defined liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and

other expenses related to the defined benefit plan are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss.

The Group recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

Equity

Capital Stock

Capital stock is classified as equity. Incremental costs directly attributable to the issuance of capital stock are recognized as a deduction from equity, net of any tax effects.

Additional Paid-in Capital

The amount of contribution in excess of par value is accounted for as "Additional paid-in capital." Additional paid-in capital also arises from additional capital contributions from the shareholders.

Retained Earnings and Dividend Distribution

Retained earnings include current and prior years' results, net of transactions with shareholders and dividends declared, if any.

Dividend distribution to the Group's shareholders is recognized as a liability, and deducted from equity in the Group's consolidated statements of financial position in the period in which the dividends are approved and declared by the Group's BOD.

Treasury Stock

Own equity instruments which are reacquired are carried at cost and are deducted from equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments. When the shares of stock are retired, the capital stock account is reduced by its par value and the excess of cost over par value upon retirement is charged to additional paid-in capital to the extent of the specific or average additional paid-in capital when the shares of stock were issued and to retained earnings for the remaining balance.

Other Comprehensive Income

Other comprehensive income are items of income and expense (including reclassification adjustments, if any) such as remeasurements of defined benefit plans that are not recognized in profit or loss as required or permitted by the related accounting standards.

Revenue and Expense Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the amount of revenue can be reliably measured. Revenue is measured at fair value of consideration received or receivable, net of sales discounts. The following specific recognition criteria must also be met before revenue is recognized:

- *Sale of Goods* is recognized when significant risks and rewards of ownership have been transferred to the customer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing management involvement with the goods, and the amount of revenue can be measured reliably. If it is probable that discounts will be granted and the amount can be measured reliably, then the discount is recognized as a reduction of revenue as the sales are recognized. Accordingly, advances received prior to delivery of goods

are recorded as unearned revenues and are earned upon physical delivery and acceptance by customer. Unearned revenues are classified as current liabilities.

- *Concession Income* pertains to the fixed percentage income from sales of concessionaire supplier's goods sold inside the store. The income is recognized when earned.
- *Membership Income* refers to fees from members wherein such fees permit only membership, and all other services or products are paid for separately. The fee is recognized as revenue when no uncertainty as to its collectability exists.
- *Interest Income* is accrued on a time proportion basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the asset's net carrying amount on initial recognition. Interest income is presented net of final tax.
- *Rent Income* from property and equipment is recognized as revenue on a straight-line basis over the term of the lease. Lease incentives granted are recognized as an integral part of the total rent income, over the term of the lease.
- *Dividends* are recognized when the Group's right as a shareholder to receive the payment is established.
- *Other Income* from display, demonstration or sampling, endcap or palette income, merchandise support and miscellaneous income are recognized when earned.

Cost of Sales

Cost of sales includes the purchase price of the products sold, as well as costs that are directly attributable in bringing the merchandise to its intended condition and location. These costs include the cost of storing and transporting the products (i.e., freight costs or trucking costs, cross-dock delivery fees, and other direct costs). Vendor returns and allowances are generally deducted from cost of sales.

Operating Expenses

Operating expenses constitute costs of administering the business. These are recognized as expenses as incurred.

Borrowing Costs

Borrowing costs are recognized as expenses when incurred, except to the extent capitalized. Borrowing costs are capitalized if they are directly attributable to the acquisition or construction of a qualifying asset. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are being incurred. Borrowing costs are capitalized until the assets are substantially ready for their intended use. If the carrying amount of the asset exceeds its recoverable amount, an impairment loss is recognized.

Income Taxes

Current Tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred Tax

Deferred tax is recognized in respect of temporary differences between the carrying

amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- with respect to taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits - Minimum Corporate Income Tax (MCIT) and unused tax losses - Net Operating Loss Carryover (NOLCO), to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, and the carryforward benefits of MCIT and NOLCO can be utilized, except:

- where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- with respect to deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Current tax and deferred tax are recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value Added Tax (VAT)

Revenues, expenses and assets are recognized net of the amount of VAT, except:

- where the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and

- receivables and payables that are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of “Prepaid expenses and other current assets” or “Accounts payable and accrued expenses” in the consolidated statements of financial position.

Leases

Group as Lessee

Leases in which a significant portion of the risks and rewards of ownership is retained by the lessor are classified as operating leases. Payments made under operating leases are recognized in profit or loss on a straight-line basis over the term of the lease.

Group as Lessor

Leases where the Group does not transfer substantially all the risks and benefits of ownership of the assets are classified as operating leases. Rent income from operating leases is recognized as income on a straight-line basis over the lease term. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized as an expense over the lease term on the same basis as rent income.

Related Parties

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control. Related parties may be individuals or corporate entities.

Foreign Currency Transactions and Translation

Transactions in currencies other than Philippine peso are recorded at the rates of exchange prevailing on the dates of the transactions. At each reporting date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing at the reporting date. Assets and liabilities carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Gains and losses arising from foreign currency transactions are recognized in profit or loss.

Segment Reporting

An operating segment is a component of an entity that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity), whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

The Group determines and presents operating segments based on the information that is internally provided to the Chairman and the President, collectively as the Group's chief operating decision maker. The Group assessed that its retailing business as a whole represents a single segment.

Provisions and Contingencies

A provision is recognized when the Group has a legal or constructive obligation as a result of a past event; it is probable that an outflow of economic benefits will be required to settle the obligation; and a reliable estimate can be made on the amount of the obligation.

Provisions are revisited at each reporting date and adjusted to reflect the current best estimate. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pretax rate that reflects the current market assessment of the time value of money, and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed in the notes to the consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

Basic and Diluted Earnings Per Share (EPS)

Basic EPS is computed by dividing net income by the weighted average number of common shares outstanding during the period, after retroactive adjustment for stock dividend declared in the current period, if any. Diluted EPS is also computed in the same manner as the aforementioned, except that, the net income and the number of common shares outstanding is adjusted for the effects of all potential dilutive debt or equity instruments.

Events After the Reporting Date

Post year-end events that provide additional information about the Group's position at the reporting date (adjusting events) are recognized in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

these related assets.

Acquisitions of Subsidiaries

The following are the developments relating to the Parent Company's investments in subsidiaries in 2016 and 2015:

Entenso Equities Incorporated (Entenso)

On July 3, 2013, the Parent Company's BOD approved the acquisition of Entenso's entire outstanding capital stock. On the same day, the BOD of Entenso approved the increase in Entenso's authorized capital stock from P5.00 million divided into 50,000 shares at P100 par value to P1.00 billion divided into 10,000,000 shares at P100 par value.

In 2015, the Parent Company made an additional investment to Entenso amounting to P1.7 billion. Entenso is in the process of filing application for an increase in its authorized capital stock with the SEC.

Company E Corporation

On January 14, 2013, the Parent Company's BOD approved the acquisition of Company E Corporation (the company behind the Eunilaine Foodmart and Grocer E Supermart chains). The Parent Company acquired 290,000 common shares of Company E representing its total outstanding shares at P1,137.93 per share through cash. Company E has seven supermarkets within Metro Manila, six in Rizal province and two in the province of Cavite which will operate the same store as the Parent Company. As at December 31, 2014, there are fourteen stores in operation, one store in Rizal was closed in the same year.

On March 25, 2014, the BOD approved the merger of the Parent Company with Company E Corporation. It was then ratified by at least two-thirds (2/3) votes of the stockholders on May 13, 2014 during the annual stockholders' meeting with its salient features discussed in Note 1. In April 2015, upon approval by the SEC of the merger, the existence of Company E ceased and all its assets and liabilities were merged with the Parent Company.

Kareila Management Corporation

On December 21, 2012, the BOD of Kareila approved the declaration of stock dividends amounting to P329.69 million from its unrestricted retained earnings as at December 31, 2012. The date of record and date of payment are April 15, 2013 and April 30, 2013, respectively.

On November 28, 2013, the BOD of Kareila resolved to increase its authorized capital stock from P500 million divided into 5 million shares, with par value of P100 per share to P3,000 million pesos divided into 30 million shares with a par value of P100 per share. Out of the increase in the authorized capital stock of P2,500 million, 25% of which or P625 million had been actually subscribed by the Parent company out of the stock dividend declared by Kareila. On the same date, the Kareila amended its articles of incorporation. Subsequently, on December 13, 2013, SEC approved the Kareila's application of its increase in authorized capital stock.

The BOD of Kareila approved the declaration of dividends from its unrestricted retained earnings as follow:

a.7. Acquisition of Bargain City Inc. (BCI), Multi-Merchantrade Inc. (MMI) and Superplus Corporation (SC) (collectively as “Budgetlane Supermarkets”)

On August 6, 2015, the Group through Goldtempo Corporation, a wholly owned subsidiary of Entenso, acquired substantially all of the assets of BCI, MMI and SC. Goldtempo took over the operations of 8 supermarkets located mainly in Metro Manila and Luzon.

The following summarizes the consideration transferred, and the recognized amounts of assets acquired assumed on BCI, MMI and SC at the acquisition date:

Acquisition cost	P1,496,500,821
Fair value of net assets	657,924,901
Goodwill	P838,575,920

There was no identifiable intangible asset as at acquisition and valuation dates. The excess of the purchase price over the assets acquired and the liabilities assumed is attributable to goodwill amounting to P838.58 million.

The Group used provisional fair values of the identifiable net assets in calculating the goodwill of DCI, FLST, BCI, MMI and SC as at the acquisition date. Upon finalization of the purchase price allocation exercise, the Group will restate the amounts of the net assets acquired and goodwill, in accordance with PFRS 3.

b. Trademark and Customer Relationship

The fair value of the trademark and customer relationship was determined after giving due consideration to various factors and valuation methodologies including the independent valuation study and analysis prepared by an independent valuation specialist. The Parent Company, after considering the said valuation methodologies, viewed the royalty relief (based on commercial rates) and multi-period excess earnings methodologies to be generally more relevant, compared to other methodologies that may be used to value the Parent Company's trademarks and customer relationships, on the basis that such methodologies require fewer assumptions and less reliance on subjective reasoning since key assumptions come from primary sources based on the Parent Company's filings and projections, actual industry precedents and industry common practice.

Impairment of Goodwill, Trademark and Customer Relationship

The recoverable amount of goodwill, trademark and customer relationship has been determined based on value in use (VIU), using cash flow projections covering a five-year period. It is based on a long range plans approved by management. The VIU is based on a 2% terminal growth rate and discount rate of 10%. The terminal growth rate used is consistent with the long-term average growth rate for the Group's industry. The discount rate is based on the weighted average cost of capital (WACC) by taking into consideration the debt equity capital structure and cost of debt of comparable companies and cost of equity based on appropriate market risk premium. The financial projection used in the VIU is highly dependent on the gross sales and gross profit margin. For purposes of growth rate sensitivity, a growth rate scenario of 2% and 3% is applied on the discounted cash flow analysis. Based on the sensitivity analysis, any reasonably possible change in the key assumptions would not cause the carrying amount of goodwill, trademark and customer relationship to exceed its recoverable amount.

Management assessed that there is no impairment in the value of goodwill, trademark and customer relationship as at March 31, 2016 and December 2015.

c. Leasehold Rights and Computer Software and Licenses

On January 25, 2013, the Parent Company executed a memorandum of agreement with various lessors, namely, BHF Family Plaza, Inc. (BHF), Lim Y-U Group, Inc., and R&A Malvar Trading Company, Inc. which paved the way for the establishment of five (5) Puregold stores previously owned and operated by these lessors. Under the agreement, the lessors agreed to sell to the Parent Company all merchandise inventories, equipment, furniture and fixtures as well as granting of rights to lease the buildings owned by each lessor for a period of twenty (20) years upon compliance of the conditions set forth in the memorandum of agreement. As a result of the transaction, the Parent Company recognized leasehold rights representing the excess of cost paid over the fair value of all assets acquired which will be amortized on a straight-line basis over the lease period.

The movements and balances of leasehold rights and computer software and licenses consists of:

*Other related parties pertain to entities under common control.

The Group, in the normal course of business, has transactions with its related parties as follows:

a. Lease of Building

The Group leases the building from its related parties where some stores are located. The Group pays its related parties a minimum fixed amount or is calculated in reference to a fixed sum per square meter of area leased. The terms of the lease are for the periods ranging from ten to thirty-five (10 -35) years, renewable for the same period under the same terms and conditions. The rent shall escalate by the range from 1% to 7%. Rental payments are fixed amounts based on the contracts.

b. Consignment and Concession

On September 27, 2006, PSMT Philippine, Inc. (PriceSmart), referred to as the "Consignee," an entity under common control, entered into a consignment and concession contract with Kareila, referred to as the "Consignor." The Consignee is the owner and operator of four (4) Warehouse, (1) Fort Bonifacio Global City, Taguig City, Metro Manila; (2) Congressional Avenue, Bago-Bantay, Quezon City; (3) Aseana Business Park, Brgy. Tambo, Paranaque City; and (4) Westgate, Filinvest Alabang, Muntinlupa City, including all the furniture, fixtures and equipment presently situated therein.

Under the contract, the Consignor offered to consign goods at the aforesaid four (4) stores and the Consignee accepted the offer subject but not limited to the terms and conditions stated as follows:

- The Consignee hereby grants to the Consignor the right to consign, display and offer for sale, and sell goods and merchandise as normally offered for sale by Consignee, at the selling areas at the four (4) stores.
- The Consignor shall give the Consignee a trade or volume discount of its gross sales.
- The proceeds of sale of the Consignor shall remain the sole property of the Consignor and shall be kept by the Consignee strictly as money in trust until remitted to the Consignor after deducting the amounts due to the Consignee.
- The term of the contract shall be for a period of five (5) years beginning on the date/s of the signing of the agreement or of the opening of the four (4) stores whichever is later, renewable upon mutual agreement of the parties.
- For and in consideration of the consignment/concession right granted, the consignor gives the consignee a trade or volume discount in the amount equivalent to five percent (5%) of the consignee's gross sales which was increased to fifteen percent (15%) on November 9, 2006. On January 1, 2011, the contract was further amended giving the consignee a trade or volume discount of ten percent (10%) of the consignee's gross sales.

On February 23, 2012, a new agreement was made between the Consignor and Consignee. Under the new agreement, the Consignor offered to consign goods at the aforesaid four (4) stores and the Consignee accepted the offer subject but not limited to the terms and conditions stated as follows:

- The Consignor shall pay the Consignee four percent (4%) monthly

consignment/concession fee based on the Consignor's monthly gross sales.

- Goods sold by the consignor shall be checked-out and paid at the check-out counters of and be manned and operated by the Consignor and issued receipts through the point-of-sale (POS) machines in the name of the Consignor. The proceeds of the sale are and shall remain as the sole property of the Consignor subject to its obligation to pay the consideration stipulated.
- Ownership of the goods delivered to the Consignor at the stores shall remain with the Consignor. Except for the right of Consignee to the payment of the consideration in the amount, manner and within the periods stipulated.
- The Consignment/Concession Contract shall be for a period of five (5) years beginning on March 1, 2012, renewable upon mutual agreement of the parties.

c. Other Significant Transactions

These pertain to purchases and sale of merchandise, rent income, security deposits paid, repairs and maintenance, utilities, communications, management fee and employee benefits which are unsecured, noninterest-bearing and due and demandable. The Group has not made any allowance for impairment losses relating to receivables from related parties as at March 31, 2016 and December 31, 2015. This assessment is undertaken annually by management through examination of the financial position of related parties and the market in which they operate.

d. Royalty Agreement

On August 15, 2011, the Group ("licensee") entered into a license agreement with a stockholder ("licensor") for its use of trademark and logo. The licensee will pay the licensor royalties in an amount equivalent to 1/20 of 1% of net sales for the period of thirty (30) years, renewable upon mutual written consent of the parties. These royalty fees and payables are unsecured, non-interest bearing and due and demandable.

22. Retirement Benefits Liability

The Parent Company has an unfunded, noncontributory, defined benefit plan covering all of its permanent employees. Contributions and costs are determined in accordance with the actuarial studies made for the plan. Annual cost is determined using the projected unit credit method. The Group's latest actuarial valuation date is December 31, 2015. Valuations are obtained on a periodic basis.

Salient Provisions of the Retirement Plan

Normal Retirement (Minimum Retirement Law, RA 7641)

The plan provides retirement benefits under Republic Act No. 7641 (the Act) upon compulsory retirement at the age of sixty five (65) or upon optional retirement at age sixty (60) or more but not more than age sixty five (65) with at least five (5) years in service. The benefits as required by the Act are equivalent to at least one-half month (1/2) month salary for every year of service, a fraction of at least six (6) months being considered as one (1) whole year. The term one-half (1/2) month salary shall mean: (a) 50% of the pay salary; (b) one-twelfth (1/12) of the thirteenth (13th) month pay; and (c) one-twelfth (1/12) cash equivalent of not more than five (5) days of service incentive leaves.

The reconciliation of the liability recognized in the statements of financial position is as follows:

	March 2016	December 2015
Present value of defined benefit obligation	P465,327,210	P465,327,210
Fair value of plan assets	(25,455,537)	(25,455,537)
Retirement benefits liability	P439,871,673	P439,871,673

The following table shows reconciliation from the opening balances to the closing balances for present value of defined benefit obligation:

	March 2016	December 2015
Balance at January 1	P465,327,210	P419,338,336

Balance at December 31	P465,327,210	P465,327,210

The movements in the fair value of plan assets are as follows:

	March 2016	December 2015
Beginning of the year	P25,455,537	P25,000,000
Interest income	-	1,122,500
Contributions during the year	-	-

End of the year	P25,455,537	P25,455,537

The movements of actuarial losses, before deferred income taxes recognized in other comprehensive income are as follows:

	March 2016	December 2015
Remeasurements of retirement liability at beginning of year	P929,780	P59,945,690
Actuarial loss (gain) due to increase in defined benefit obligation	-	(59,015,910)
Remeasurements of retirement liability at end of year	P929,780	P929,780

The cumulative remeasurements of retirement benefits liability, net of deferred income taxes, amounted to P0.65 million as at March 31, 2016 and December 31, 2015, as presented in the consolidated statements of changes in equity.

The Company's plan assets consist of the following:

	March 2016	December 2015
Cash in banks	P18,853,459	P18,853,459
Debt instruments - government bonds	6,528,968	6,528,968
Trust fees payable	(12,727)	(12,727)
Other	85,837	85,837
	P25,455,537	P25,455,537

The following were the principal actuarial assumptions at the reporting date:

	March 2016	December 2015
Discount rate	4.89%	4.89%
Future salary increases	9.00%	9.00%

Assumptions regarding future mortality have been based on published statistics and mortality tables.

The weighted average duration of the defined benefit obligation at the end of the reporting period is 26.3 years.

Sensitivity Analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:

2016

	Increase	Decrease
Discount rate (1% movement)	(P55,684,579)	P50,070,316
Future salary increase rate (1% movement)	54,281,683	(43,277,285)

It should be noted that the changes assumed to be reasonably possible at the valuation date are open to subjectivity, and do not consider more complex scenarios in which changes other than those assumed may be deemed to be more reasonable.

These defined benefit plans expose the Group to actuarial risks, such as longevity risk, interest rate risk, and market (investment) risk.

Funding Arrangements

Since the Group does not have a formal retirement plan, funding to the plan are paid by the Group when needed.

Maturity analysis of the benefit payments:

	Carrying Amount	Contractual Cash Flows	2016		
			Within 1 Year	Within 1 - 5 Years	Within 5 - 10 Years
Defined benefit obligation	P465,327,210	P86,522,673	P12,059,433	P19,337,430	P55,125,810

On February 17, 2014, the Parent Company entered into a multi-employer retirement plan agreement with a trust company. The Parent Company made an initial cash contribution of P25 million pesos.

The Group does not expect to contribute to the plan in 2016.

*Excluding accrued rent expense of PPCI Subic which is subject to SBMA tax rules

The realization of these deferred tax assets is dependent upon future taxable income that temporary differences and carry forward benefits are expected to be recovered or applied.

Deferred tax asset includes P5.04 million net deferred tax assets transferred by Company E to the Company as a result of the merger. It includes the following:

	Amount	DTA (DTL)
Accrued rent expense	P18,086,366	P5,425,910
Accrued rent income	(74,892)	(22,468)
Net	(P18,011,474)	P5,403,442

The Group has unrecognized net operating loss carryover (NOLCO) and minimum corporate income tax (MCIT) amounting to P38.43 million and P3.39 million, respectively. This was transferred through the merger of Gant with the Parent Company. In December 31, 2015, the remaining balance of NOLCO and MCIT was fully applied against the taxable income.

24. Equity

Capital Stock and Additional Paid-in Capital

On June 7, 2011, the BOD approved the issuance of 50,000,000 shares. These were subscribed and paid in full on June 10, 2011.

The initial public offering of the Parent Company's shares with an offer price of P12.50 per share resulted to the issuance of 500,000,000 common shares in 2011. The additional paid-in capital net of direct transaction costs amounted to P5,168.82 million.

The Parent Company acquired 100% equity interest of Kareila in exchange for the 766,406,250 common shares of the Parent Company's authorized but unissued capital

stock on May 28, 2012. The fair value of shares as at the acquisition date is P21.50 per share. The additional paid-in capital net of direct transaction costs amounted to P15,661.57 million.

On February 26, 2013, the SEC approved the application for merger of the Parent Company, PJSI and Gant. As a consideration for the said merger, the Parent Company paid the owner of PJSI and Gant shares of stocks equivalent to 16,911,162 shares at P26.55 per share. Considering that the owner of PJSI and Gant is the Parent Company, 16,911,006 of the total shares issued were classified in the Parent Company's book as treasury shares.

On March 12, 2015, the SEC approved the application of merger of the Parent Company and Company E. As a consideration for the said merger, the Parent Company paid the owner of Company E shares of stocks equivalent to 2,045,465 shares at par value. Considering that the owner of Company E is the Parent Company, total shares of stocks issued were classified in the Parent Company's book as treasury shares.

The Parent Company's authorized, issued and outstanding common stocks as at March 31 are as follow:

Cash	December 18, 2014	January 12, 2015	February 5, 2015	P829,921,923

Due to the effect of merger, retained earnings of PJSI and Gant amounting to P445.29 million formed part of the retained earnings of the Parent Company. PJSI and Gant were 100% wholly-owned by the Parent Company before merger.

Due to the effect of merger, retained earnings of Company E amounting to P116.89 million formed part of the retained earnings of the Parent Company. Company E was 100% wholly-owned by the Parent Company before merger.

25. Segment Information

The Group operates through stores in several locations. The combined financial statements of all per stores is reviewed by the Chief Operating Decision Maker on a monthly basis and assesses the Group's profitability and financial position of the whole retail business. The nature of products, class of customers, and regulatory environment is the same for all the stores.

Accordingly, management has assessed that the Group, as a whole, is considered as a single business and hence there are no operating segments required to be disclosed under PFRS 8, *Operating Segments*.

26. Basic/Diluted EPS

Basic/Diluted EPS for the periods ended March 31 is computed as follows:

	2016	2015
Net income (a)	P1,154,283,533	P1,054,196,539
Weighted average number of ordinary shares (b)	2,765,381,406	2,766,314,739
Basic/diluted EPS (a/b)	P0.42	P0.38

As at March 31, 2016 and December 31, 2015, the Group has no dilutive debt or equity instruments.

27. Financial Risk and Capital Management Objectives and Policies

Objectives and Policies

The Group has significant exposure to the following financial risks primarily from its use of financial instruments:

- Credit Risk
- Liquidity Risk
- Interest Rate Risk
- Other Market Price Risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risks, and the Group's management of capital.

The Group's principal financial instruments include cash and cash equivalents and investments in trading securities. These financial instruments are used to fund the Group's operations and capital expenditures.

The BOD has overall responsibility for the establishment and oversight of the Group's risk management framework. They are responsible for developing and monitoring the Group's risk management policies.

The Group's risk management policies are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. All risks faced by the Group are incorporated in the annual operating budget. Mitigating strategies and procedures are also devised to address the risks that inevitably occur so as not to affect the Group's operations and detriment forecasted results. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

Credit Risk

Credit risk represents the risk of loss the Group would incur if credit customers and counterparties fail to perform their contractual obligations.

Exposure to credit risk is monitored on an ongoing basis. Credit is not extended beyond authorized limits. Credit granted is subject to regular review, to ensure it remains consistent with the customer's credit worthiness and appropriate to the anticipated volume of business.

Receivable balances are being monitored on a regular basis to ensure timely execution of necessary intervention efforts.

The credit risk for due from related parties and security deposits was considered negligible since these accounts have high probability of collection and there is no current history of default.

Financial information on the Group's maximum exposure to credit risk without considering the effects of collaterals and other risk mitigation techniques is presented below.

The Group has assessed the credit quality of the following financial assets that are neither past due nor impaired as high grade:

- Cash in bank and cash equivalents were assessed as high grade since these are deposited in reputable banks with good credit standing, which have a low profitability of insolvency and can be withdrawn anytime. The credit quality of these financial assets is considered to be high grade.
- Trade receivables were assessed as high grade since majority of trade receivables are credit card transactions and there is no current history of default. Non-trade receivables from suppliers relating to rental, display allowance and concession and advances to contractors were assessed as high grade since these are automatically deducted from the outstanding payables to suppliers and contractors. Advances to employees were assessed as high grade as these are paid through salary deductions and have a high probability of collections.
- Due from related parties and security deposits were assessed as high grade since these have a high profitability of collection and there is no history of default.

Liquidity Risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group manages liquidity risk by forecasting projected cash flows and maintaining balance between continuity of funding and flexibility in operations. Treasury controls and procedures are in place to ensure that sufficient cash is maintained

to cover daily operational working capital requirements. Management closely monitors the Group's future and contingent obligations and sets up required cash reserves as necessary in accordance with internal requirements.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

Interest Rate Risk

Interest rate risk is the risk that future cash flows from a financial instrument (cash flow interest rate risk) or its fair value (fair value interest rate risk) will fluctuate because of changes in market interest rates. The Group is exposed to interest rate risk on interest earned on cash deposits in banks. Cash deposits with variable rates expose the Group to cash flow interest rate risk. The Group is not exposed to interest rate risk since its short and long-term loans with fixed rates are carried at amortized cost. The Group's policy is to obtain the most favorable interest available without increasing its foreign currency exchange exposure.

The interest rate profile of the Group's interest-bearing financial instruments is as follows:

	March 2016	December 2015
Financial assets (cash deposits):		
Cash in banks	P1,723,491,265	P1,577,093,521
Money market placement	589,527,276	3,933,435,315
	P2,313,018,541	P5,510,528,836

Sensitivity Analysis

A 2% increase in interest rates would have increased equity and net income by P3.24 million and P7.71 million, for the periods ended March 31, 2016 and December 31, 2015,

respectively. A 2% decrease in interest rates would have had the equal but opposite effect, on the basis that all other variables remain constant.

Other Market Price Risk

The Group's market price risk arises from its investments in trading securities carried at fair value. The Group manages its risk arising from changes in market price by monitoring the changes in the market price of the investments.

Capital Management

The Group's objectives when managing capital are to increase the value of shareholders' investment and maintain steady growth by applying free cash flow to selective investments. The Group set strategies with the objective of establishing a versatile and resourceful financial management and capital structure.

The Group's President has overall responsibility for monitoring of capital in proportion to risk. Profiles for capital ratios are set in the light of changes in the Group's external environment and the risks underlying the Group's business operations and industry.

The Group defines capital as paid-up capital, additional paid-in capital, remeasurements and retained earnings as shown in the statements of financial position.

There were no changes in the Group's approach to capital management during the year.

The Group is not subject to externally imposed requirements.

28. Financial Instruments

The carrying amounts of Company's financial instruments approximate their fair values as at March 31, 2016 and December 31, 2015.

The following methods and assumptions are used to estimate the fair values of each class of financial instruments:

Cash and Cash Equivalents, Short-term Investments, Receivables and Security Deposits

The carrying amounts of cash and cash equivalents, short-term investments and receivables approximate fair values due to the relatively short-term maturities of these financial instruments. In the case of security deposits, the difference between the carrying amounts and fair values is considered immaterial by management.

Investments in Trading Securities and Available-for-Sale Financial Assets

The fair values of publicly traded instruments and similar investments are based on quoted market prices in an active market. For debt instruments with no quoted market prices, a reasonable estimate of their fair values is calculated based on the expected cash flows from the instruments discounted using the applicable discount rates. Unquoted equity securities and derivative instruments linked to unquoted stock are carried at cost less impairment.

Accounts Payable and Accrued Expenses, Short-term Loans, Due to Related Parties, Other Current Liabilities and Noncurrent Accrued Rent

The carrying amounts of accounts payable and accrued expenses, due to related parties, and short-term loans approximate fair value due to the relatively short-term maturities of these financial instruments. The difference between the carrying amounts and fair values of noncurrent accrued rent and other current liabilities is considered immaterial by management.

Long-term Loans including Current Maturities

The fair value of interest-bearing fixed rate loans is based on the discounted value of expected future cash flows using the applicable market rates for similar types of instruments as at reporting date. Effective rates used in 2016 and 2015 range from 3.50% to 3.61%.

Fair Value Hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

As at March 31, 2016 and December 31, 2015, the Group's investment in trading securities were measured based on Level 1 classification and available for sale financial assets were carried at cost since the fair value cannot be determined reliably in the absence of any market data.

As at March 31, 2016 and December 31, 2015, the Group has not introduced any movement among Levels 1, 2 and 3 classifications.

29. Reclassification of Accounts

Certain accounts in 2015 financial statements have been reclassified to conform with the 2016 financial statements presentation as follows:

	March 2015		
	As Previously Presented	Reclassification	As Reclassified
Statement of Profit or Loss			
Cost of sales	P17,125,753,756	(P95,000,437)	P17,030,753,319
Other operating income	(741,713,840)	95,000,437	(646,713,403)
	(P16,384,039,916)	P -	(P16,384,039,916)
